

# ZHEUS

## WHERE TECHNOLOGY REVEALS BEAUTY

myZHEUS is not just a laser. It's a new vision of patient care.

Cutting-edge technology and advanced design come together to redefine every clinical gesture, transforming your practice into a space focused on the future of dentistry and aesthetic surgery.

LITEMEDICS  
litemedics.com

The future of your profession starts here: **myZHEUS**, the next-generation erbium laser that redefines the boundaries of dentistry and opens new horizons in aesthetic medicine. Designed to effectively treat all tissues – both hard and soft - **myZHEUS** delivers speed, precision, and comfort in every clinical procedure. A single platform to successfully perform gingival and bone surgery, restorative treatments, composite removal, gingival depigmentation, fissure sealing, and much more, including treatments on pediatric patients.

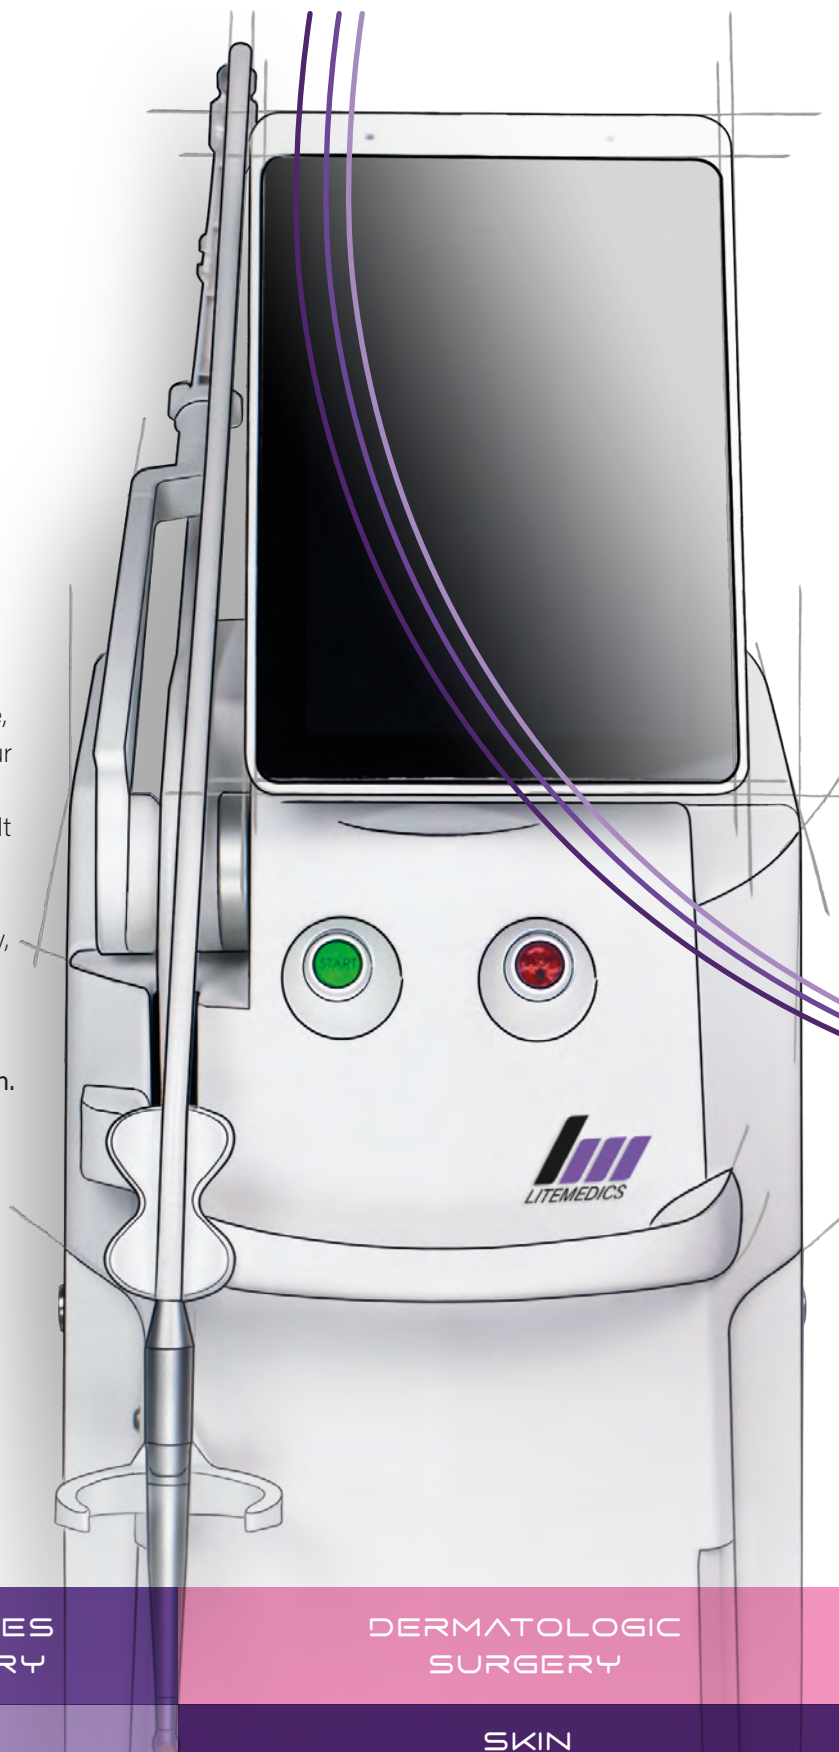

With the **Derma** upgrade, **myZHEUS** expands its scope to dermatology and skin bioregeneration, transforming your practice into a comprehensive clinical center, fully equipped to integrate **dentistry** and **aesthetic medicine** into a single professional solution.

Powered by smart technology and an intuitive user interface, **myZHEUS** features an **Android** platform, **Wi-Fi Direct** connectivity, and a large **10.1" touchscreen display** with icons guiding the operator step by step. For experienced professionals, every parameter is customizable for a fully tailored management.

Choosing **myZHEUS** means saving time, enhancing performance, expanding your treatment options, and **standing out in the market with a high value offering**. It is the ideal solution for those who want to grow, differentiate themselves, and deliver the best in technology, efficiency, and results.

**myZHEUS** is much more than a laser. It is evolution, versatility, and innovation.

# CLICK ONCE PERFORM MORE

With myZHEUS, you have the full power of technology at your fingertips: an all-in-one platform for dental, therapeutic, and dermatological treatments. Switch handpieces with an easy click, select the application from the intuitive display, and you're ready to go. **Maximum simplicity, maximum performance.**

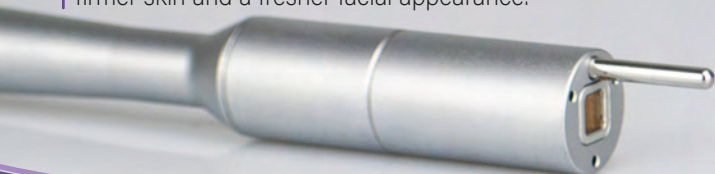

## BOOST HANDPIECE

The Boost handpiece is perfect for Class I, II, III, IV, and V restorative applications, as well as soft and hard tissue surgery; ideal for performing minimally invasive aesthetic surgery procedures (such as xanthelasma, seborrheic warts, fibromas, cysts, etc.).

## FRACTIONAL HANDPIECE

Handpiece with spacer, ideal for minimally invasive skin photorejuvenation (reduction of facial wrinkles and skin laxity), delivering excellent results with firmer skin and a fresher facial appearance.

## 90° HANDPIECE

Handpiece for Class II applications, endodontics, and peri-implantitis treatments.

## 0° STRAIGHT HANDPIECE

Handpiece for soft and hard tissue surgery, anterior teeth applications, and desensitization. Used in restorative dentistry for Class III and IV treatments

## SAPPHIRE TIPS

Sapphire tips available in various sizes, with color-coded tip holders depending on the treatment

## FULL FIELD HANDPIECE

Handpiece ideal for the treatment of benign facial skin lesions (xanthelasma, atrophic and hypertrophic scars, seborrheic keratosis, flat warts, senile lentigo, milia, melasma, and dermal nevi), equipped with various spacers for 2, 3, and 5 mm spot sizes

# YOUR BEAUTY IS TIMELESS

**myZHEUS**, the innovation that expands the boundaries of your profession.

There comes a moment when you feel it's time to go beyond. To grow, evolve, and offer something more to yourself and your patients. With **myZHEUS**, that moment is now.

Designed for those who look ahead, **myZHEUS** is more than just a tool: it's an extension of your vision. Precise, powerful, and incredibly versatile. It guides you on a journey that opens doors to new specializations, such as **aesthetic surgery**, transforming your practice into a place where innovation and beauty meet.

More procedures, more clinical cases, more stories to write. With **myZHEUS**, every day is the beginning of something extraordinary.

## Technical Data

Code	LAERT001.1
Wavelength	2940 nm
Peak Power	12W
Max Energy	600 mJ

Frequency	Variable from 5 to 100 Hz
Dimensions (LxHxW)	277x895x547 mm
Weight	35 kg
Medical Class	II b
Laser Class	4
